Singing in circle

Hi everyone !

Let me present you with my music in its participative form, the invisible CIRCLE SOUND SYSTEM and the specific live SETUP.

I sing MULTI VOICE SONGS along with my audience and developed a specialized circle amplification for this purpose. This sensitive sound allows me to lead large crowds without losing the intimacy of an „unplugged“ choir.

Weaving the different voices and instruments into each other is an ecstatic singing experience together with everyone.

Singing in circle

Singing with the audience became popular beyond the mantra scene. British artist Jakob Collier for example conducts thousands from big stages with powerful PA soundsystems into collective vocal music. However this form of amplification is NOT adjusted to the volume of the singing audience. The CIRCLE SOUND SYSTEM and people sitting in voice groups around a center stage allows a much more intimate singing experience. This hidden amplification is just loud enough for everyone to hear my voice, instruments AND themselves.

Circle Setup

Progressive ideas need a clear setup to unfold, therefore we invite everyone to sit in VOICE GROUPS (men-women) close to each other. This subtle frame matters as much as the sensitive amplification. Both create a supportive choir sound for the individual to feel safe and empowered to sing. Warm light and an oriental ambient frame a TWO HOUR JOURNEY guided by me with guitar and flutes or as a duo with Mexican e-guitar player Luke. For outdoor events we offer the CIRCLE MUSIC TEMPLE, a circular tarp 9m or 14m in diameter.

Yoga path

Inspired by the teachings of Swami Sivananda, Rudolf Steiner, Heinz Grill and from many years of travelling in Europe as a musician and peace activist I write and share spiritual songs. July 2025 I toured in the Ukraine and for the last four winters taught music to refugees on the Greek island of Lesbos.

Singing with everyone creates light for the world.
